Min Elevation:	3,967 ft	Peak Elevation:	4,807 ft
Total Ascent:	1,229 ft	Total Descent:	663 ft
Gradient Bias:	Mostly Uphill		

Description

Pritchett Canyon is one of Moab's most infamous and unforgiving rock crawling trails, known for relentless obstacles and a reputation for breaking even well-built rigs. The trail is packed with major features like Rocker Knocker, Axle Hill, and Yellow Hill—each demanding precise lines, traction, and often multiple attempts. There are few easy sections, and bypasses are limited, making commitment a big part of the experience. Expect steep climbs, off-camber rock faces, and constant technical driving from start to finish. This is not a scenic cruise—it's a full-on test of driver skill and vehicle capability, and body damage is always on the table. This route ends at the intersection with Behind The Rocks Trail.
